

# Data sheet:

## Beverage packaging for wine and juices (no contain of CO 2)

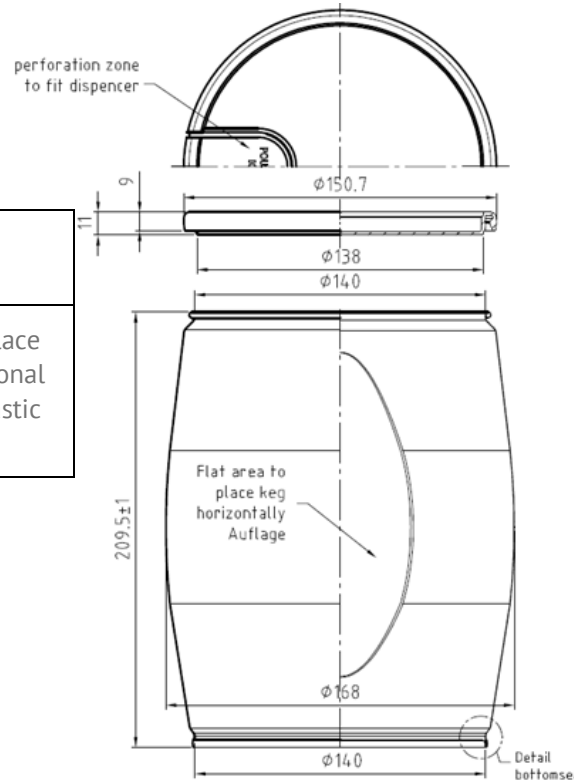

### General information:

- Welding strip WIMA welded, inside powder covered, outside varnish covered.
- Spout fixation by a special plastic plug fixed into the top end – easy handling for customer.
- Bag-in-box-system; no oxygen reaches the beverage –shelf live for weeks after starting tapping.
- Body and top-end printable (plastic top-end by inlay-molding) = big advertising space!
- Second use as cooling bucket for wine bottles (3 Liter-Keg)
- All sizes are passing a leaking control system, piece by piece, 100 % control after production.

Special sizes and versions on request.
