

Beverage packagings for wine and juices (no contain of CO²)

Diameter	Height / Volume	Remarks
140/168	210 mm / 3,0 Litre	Barrel shaping, with a flat area to place the keg horizontal for tapping, optional with plastic- or metal lid with plastic cap for fixing the tapping device.
160/197	239 mm / 5,0 Litre	Barrel shaping, with a flat area to place the keg horizontal for tapping, with metal lid with plastic cap for fixing the tapping device.

- Side seam WIMA welded, inside powder coated, outside protected with varnish.
- Tapping device fixation by a special plastic cap fixed into the lid – easy handling for the customer.
- Bag-in-Box-System; no oxygen reaches the beverage – shelf live for weeks after starting tapping.
- Body and lid printable (plastic-lid by inlay-molding) = large space for advertising!
- Secondary use as a cooler for wine bottles (3-Litre-Keg).
- 100 % fully automatic piece by piece leak test in all sizes.
